

Universal Multiple-Octet Coded Character Set  
UCS

ISO/IEC JTC1/SC2/WG2/IRG N2015

Date: 2014-05-18

Source:	Jaemin Chung
Title:	U+2827C unification issue
Status:	Member body contribution
Action required:	To be considered by the IRG
Pages:	4

Currently, there are two sources mapped to U+2827C, the T glyph with 𠵻身惡 and the H glyph with 𠵻身惡.

2827C	𠵻	𠵻	𠵻
身 158.11	UCS2003	TF-6127	H-8BAE

However, 惡 and 惡 are not unifiable components. This pair is neither in the UCV list nor in the NUC list. I checked all UCS characters that have 惡 or 惡 in it, but none of them unifies this pair (except U+2827C; see appendix for the lists of the characters with 惡 or 惡).

Also, 𠵻口惡 and 𠵻口惡 are given different code points (U+5641 噁 and U+2BAD6 噁 (Extension E)).

5641	噁	噁	噁	噁	噁	噁
口 30.12	G1-7830	HB2-E4FA	T2-4F62	J1-363F	K1-6827	V0-332C
2BAD6	噁					
口 30.11	TD-4940					

Therefore, I think something needs to be done with U+2827C.

Appendix: All UCS characters with 惡 or 惡, including Extension E (except U+2827C)

1. All UCS characters with 惡

60E1 心 61.8	惡	惡	惡	惡	惡	惡
